

CBP Trade Update Call Follow-up

On the Wednesday U.S. Customs and Border Protection (CBP) Trade Update call, there were questions asked by members of the Trade that CBP said they would need to follow-up on. CBP has shared those responses with us and can be found below.

1. In regard to Form 5106: “Considering the trade concerns presented and deployment planning needed, the 5106 Cutover scheduled for 2/9/2019 will be postponed due to the government shutdown. A new cutover date will be established and messaged with advance notice once the government reopens.”

Additional details regarding Form 5106 can be found here:

- a. [CBPF 5106 Information](#)
 - b. [Link for NEW CBPF 5106](#)
 - c. [Link to the OLD CBPF 5106](#)
2. In regard to Import Security Filing (ISF): “ISF-5 Enforcement will be postponed. Additional details are coming soon.”

ISF Help Desk: “Technically there is not an official ISF Help Desk. Questions related to ISF have been submitted to the Manifest Branch mailbox. Due to the government shutdown that box is not currently monitored.”

“ISF Reports have not changed nor have they been impacted by the shutdown. They should be operating as normal.”

“There will be an In-Bond and ISF5 CSMS message forthcoming.”

Reminder, Monday, January 21 is a federal holiday so the next CBP Trade Update call will be on Wednesday, January 23. The NCBFAA will continue to take part in these trade calls and will update our members as situations develop.
